1. title: A Back and Forth Between Tourism and Health
Subtitle: From Medical Tourism to Global Health
Author: Sebastien Fleuret
Material: site
Collection: disks
number: 61
Specimen barcode : CD-3553
Condition : in the fund
2. title: A Medical History of Humanity from Antiquity to the Present
Subtitle: The Greatest Benefit To Mankind
Author: Porter, Roy
Material: site
Collection: disks
number: 61
Copy barcode : CD-109
Condition : in the fund
3. title: Adams and Victor's Principles of Neurology
Subtitle:
Author: Ropper, A., Samuels, M., Klein, J., Prasad,s.
Material: site
Collection: disks
number: 61
Copy barcode : CD-54
Condition : in the fund
4. title: Atlas of Operative Procedures in Surgical Oncology
Subtitle:
Author: Constantine P. Karakousis
Material: site
Collection: disks
number: 61
Copy barcode : CD-3501
Condition : in the fund
5. title: Bailey & Love's Short Practice of Surgery
Subtitle:
Author: Norman S. Williams, Ronan O'Connell, Andrew W. McCaskie
Material: site
Collection: disks
number: 61
Copy barcode : CD-66
Condition : in the fund
6. title: Basic and Clinical Pharmacology
Subtitle:
Author: Bertram G. Katzung, Susan B. Masters, Anthony J. Trevor,
Printed Book
Electronic Book
48. title: Grainger & Allison's Diagnostic Radiology: Volume One
Subtitle: A Textbook of medical imaging
Author:
Material: book
Collection: Basic fund
number: 615.849(075.8) G-71
Copy barcode : 17748
Condition : in the fund
49. title: Grainger & Allison's Diagnostic Radiology: Volume Two
Subtitle: A Textbook of medical imaging
Author:
Material: book
Collection: Basic fund
number: 615.849(075.8) G-71
Copy barcode : 17749
Condition : in the fund
50. title: Grainger & Allison's Diagnostic Radiology, A Textbook of Medical Imaging. 1-2 volumes
Subtitle:
Author: Andreas Adam, Adrian K. Dixon, Jonathan H. Gillard, Cornelia M. Schaefer-Prokop

Library, Information Science & Technology Abstracts (LISTA) indexes more than 560 core journals, nearly 50 priority journals, and nearly 125 selective journals; plus books, research reports and proceedings. Subject coverage includes librarianship, classification, cataloging, bibliometrics, online information retrieval, information management and more. Coverage in the database extends back as far as the mid-1960s.
Title List
More Information
MEDLINE
MEDLINE provides authoritative medical information on medicine, nursing, dentistry, veterinary medicine, the health care system, pre-clinical sciences, and much more. Created by the National Library of Medicine, MEDLINE uses MeSH (Medical Subject Headings) indexing with tree, tree hierarchy, subheadings and explosion capabilities to search citations from over 5,400 current biomedical journals.
Title List
More Information
Health Source - Consumer Edition
This database is the richest collection of consumer health information available to libraries worldwide, providing information on many health topics including the medical sciences, food sciences and nutrition, childcare, sports medicine and general health. Health Source: Consumer Edition provides access to nearly 80 full text, consumer health magazines.
Title List
More Information
Health Source: Nursing/Academic Edition
This database provides nearly 550 scholarly full text journals focusing on many medical disciplines. Health Source: Nursing/Academic Edition also features the AHFS Consumer Medication Information, which covers 1,300 generic drug patient education sheets with more than 4,700 brand names.

HEINONLINE
HeinOnline
HeinOnline- Sulkhan Saba University offers access to world-recognized legal base HeinOnline.
HeinOnline is a premier online database containing more than 186 million pages and 287,000 titles of historical and government documents in a fully searchable, image-based format. HeinOnline bridges an important research gap by providing comprehensive coverage from inception of more than 2,800 law-related periodicals. In addition to its vast collection of academic journals, HeinOnline contains the entire Congressional Record, Federal Register, and Code of Federal Regulations, complete coverage of the U.S. Reports back to 1754, and entire databases dedicated to treaties, constitutions, case law, world trials, classic treatises, international trade, foreign relations, U.S. Presidents, and much more.

Freedom From & Freedom For by WILLIAM 0. DOUGLAS Justice of the Supreme Court of the United States While Americans fight to defend our freedoms, we must enlist as soldiers in a war to win them, says Justice speech made at the Free World House But it no longer is. Historically, freedom has generally meant "freedom from" or "freedom against." The fight for freedom has in the main been an "against" movement. This has been the case even when the people involved have believed with deep faith in vivid, positive ideas of freedom. ...To be sure, the slaves who more freedom for became converts tried to Douglas in this render unto Caesar the recent opening of things that were Caesar's. ...The fact of oppression made the idea of freedom a negative one. Being negative, it was relatively simple. ...Dickens wanted to T HE idea of freedom is as old as the fact of oppression. It has often been as simple. 49 #12;

Find exactly what you're looking for within the topic with a redesigned find feature.
INTRODUCTION
Older adults [≥65 years of age] account for a disproportionately large fraction of all surgical procedures performed in the United States (Figure 1). Although older age is a risk factor for perioperative mortality, preoperative comorbidities and the invasiveness of the planned surgical procedure are other important predictors in all age groups [1-5].
This topic will discuss age-related physiologic changes that affect anesthetic drugs and techniques and optimal perioperative anesthetic management of older patients.
IMPACT OF AGE-RELATED PHYSIOLOGIC CHANGES ON ANESTHETIC CARE
Aging is associated with a progressive loss of functional reserve in all organ systems (see "Normal aging"). However, there is considerable individual variability in the onset and extent of these changes. Nevertheless, even the healthy older adult has reduced physiologic reserve such that organ systems may be compromised during illness and/or surgical stress. Physiologic changes specifically impact anesthetic care, in part by increasing susceptibility to anesthetic drugs [6,7].
Nervous system — Age-related changes in the central and peripheral nervous system result in pharmacodynamics changes that affect older adults' responses to anesthetics and other medications, and also affect pain perception [8]. Central nervous system changes include reduction in brain size and neuronal density and widening of the sulci and ventricles. Regional reductions in neurotransmitters (eg, dopamine, serotonin, and acetylcholine) and neuroreceptors may occur [9].
• Pharmacodynamic sensitivity – Pharmacodynamic sensitivity increases with age for all intravenous (IV) agents that act within the central nervous system (eg, propofol, fentanyl, midazolam) [8]. Furthermore, there are age-related decreases in the minimum alveolar concentration (MAC) at 1 atmosphere that prevents movement in 50 percent of patients exposed to a surgical incision) [10]. In addition, a decrease in cholinergic receptor activity may explain the older patient's vulnerability to the anticholinergic side effects of medications such as diphenhydramine, meperidine, and scopolamine [9]. (See 'Selection and dosing of anesthetic agents' below and "Perioperative neurocognitive disorders in adults: Risk factors and mitigation strategies", section on 'Risk assessment'.)
